# Gap Analysis Indonesian Government Regulations

For Textile  
& Garment Industry

## GAP ANALYSIS INDONESIAN GOVERNMENT REGULATIONS

For Textile and Garment Industry

This gap analysis is a comprehensive analysis concerning a company's capability in implementing and meeting requirements of Indonesian Government Regulations.

From the analysis, the degree of conformance to the requirements can be determined.

In addition to that, the analysis may help a company in identifying opportunities to implement environmental management measures widely acknowledged in global trade, such as ISO 14001.

## BENEFITS

Indonesian textile and garment industry can meet Indonesian Government regulations.

## GOAL

1. To analyze gap in meeting Indonesian Government regulations.
2. To provide recommendations concerning necessary actions to meet the requirements.

3. To provide consultation services in meeting the requirements.

## SCOPE OF ACTIVITIES

The activities involve auditing and consultation.

The auditing is to assess the existing condition in Indonesian industry, with regard to meeting Indonesian Government regulations.

The consultation is to provide recommendations concerning necessary actions to meet the regulations.

## TIME ALLOCATION

The activities will take place in at least 1 (one) day for auditing, and 1 (one) day for consultation.

The amount of time spent for the activities will depend on specific condition in each participating company.

Analyze gap in meeting Indonesian government requirements

Maximal value from industrial waste

Provide recommendations concerning necessary action to meet the requirements

## WHAT IS PRODUKSIH ?

Indonesia's rapid industrialization is resulting in both increasing discharge of waste and degradation of natural resources.

Meanwhile, industry managers have realized that in order to stay in business they have to integrate environmental considerations into their marketing strategies.

The government of Indonesia has designed its 'Cleaner Production Strategy' to improve competitiveness, foster energy efficiency, reduce industrial waste, and preserve natural resources. In order to support this Cleaner Production Strategy an Indonesian - German project was launched as part of the Environmental Program that is called ProduksiH (Produksi Bersih).

The Indonesian institution responsible for the project is the Environmental Impact Management Agency (BAPEDAL).

GTZ/PEM is supporting the project with know-how and expertise.

Current priorities include:

### Textile

T1 : Gap Analysis Indonesian Government Regulations

T2 : Gap Analysis German Regulation on Textile  
Consumer Goods

T3 : Gap Analysis Management System Regarding  
Buyer Requirements

T4 : Gap Analysis Oko-Tex Standard 100

T5 : Gap Analysis Typical Buyer Requirement  
(Migros Eco - Label)

### Leather

L1 : Cost-Benefit-Analysis Leather

L2 : Good Housekeeping Guide for Leather Industry

### General

G1 : Good Housekeeping

G2 : Environment-oriented Cost Management

G3 : Chemical Management
