Gap Analysis Management System

Regarding Requirement
in Textile &
Garment Industry

WHAT IS PRODUKSIH ?

Indonesia's rapid industrialization is resulting in both increasing discharge of waste and degradation of natural resources.

Meanwhile, industry managers have realized that in order to stay in business they have to integrate environmental considerations into their marketing strategies.

The government of Indonesia has designed its 'Cleaner Production Strategy' to improve competitiveness, foster energy efficiency, reduce industrial waste, and preserve natural resources. In order to support this Cleaner Production Strategy an Indonesian - German project was launched as part of the Environmental Program that is called ProduksiH (Produksi Bersih).

The Indonesian institution responsible for the project is the Environmental Impact Management Agency (BAPEDAL).

GTZ/PEM is supporting the project with know-how and expertise.

Current priorities include:

Textile

T1 : Gap Analysis Indonesian Government Regulations

T2 : Gap Analysis German Regulation on Textile
Consumer Goods

T3 : Gap Analysis Management System Regarding
Buyer Requirements

T4 : Gap Analysis Öko-Tex Standard 100

T5 : Gap Analysis Typical Buyer Requirement
(Migros Eco - Label)

Leather

L1 : Cost-Benefit-Analysis Leather

L2 : Good Housekeeping Guide for Leather Industry

General

G1 : Good Housekeeping

G2 : Environment-oriented Cost Management

G3 : Chemical Management

GAP ANALYSIS

MANAGEMENT SYSTEM

Regarding Buyer Requirements in Textile and Garment Industry

There are many buyers requirements before product may enter market.

It is quite common that producers are facing difficulties in meeting such requirements because of lack of information and understanding.

Buyer's among the nation requirements but there are common components, i.e. in management system.

BENEFITS

The Indonesian industry can benefit from effective and transparent organization as well as cost effectiveness resulting from an integrated management system.

GOAL

1. To analyze gap in meeting management system requirements from buyers.
2. To measure existing company's capability to meet the requirements.

3. To provide recommendations concerning necessary action to meet the requirements.

Consultation services for implementation management system

Evaluation systematic management from buyer requirements

Protection for healthy & safety works

SCOPE OF ACTIVITIES

The gap analysis is an assessment tool addressing environment, health and safety aspects related to buyers' requirements for textile and garment industry.

The activities involve auditing and consultation.

The auditing contains document reviews and interviews with the company (producer) concerning its operation.

An audit report will be provided.

The consultation complements the auditing activity and encompasses recommendations concerning necessary actions to meet the requirements.

TIME ALLOCATION

Commonly, 2 (two) local consultants are to conduct 8-day activities, i.e.: a 2-day audit, a 1-day evaluation, and 5-day consultation.

The amount of time spent for the activities will depend on specific condition in each participating company.

4. To provide consultation the services in meeting the requirements.
