Garment Industry

GAP ANALYSIS ÖKO - TEX STANDARD 100 in TEXTILE & GARMENT INDUSTRY

In textile and garment industry, conformance to Öko-Tex Standard 100 is commonly required by buyers in the European Union member countries.

Öko-Tex Standard 100 is to assure that the textile and garment products do not contain dangerous substances with regard to human health.

BENEFITS

Indonesian industry can achieve conformance to Öko-Tex Standard 100 for their textile and garment products.

GOAL

1. To analyze gap in meeting Öko-Tex Standard 100 requirements.
2. To provide recommendations concerning necessary actions to meet Öko-Tex Standard 100 requirements.
3. To provide consultation services in meeting Öko-Tex Standard 100 requirements.

SCOPE OF ACTIVITIES

The activities involve auditing and consultation.

The auditing is to assess the existing condition in Indonesian industry. With regard to meeting the Öko-Tex Standard 100 requirements.

The consultation is to provide recommendations concerning necessary actions to meet the requirements.

TIME ALLOCATION

The activities will take place in at least 2 (two) days for auditing and 1 (one) day for consultation.

The amount of time spent for the activities will depend on specific condition in each participating company.

Consultation services for requirement Öko - Tex Standard 100 implementations

Standard implementations Öko - Tex Standard 100

Safety recommendation requirement Öko - Tex Standard 100

WHAT IS PRODUKSIH ?

Indonesia's rapid industrialization is resulting in both increasing discharge of waste and degradation of natural resources.

Meanwhile, industry managers have realized that in order to stay in business they have to integrate environmental considerations into their marketing strategies.

The government of Indonesia has designed its 'Cleaner Production Strategy' to improve competitiveness, foster energy efficiency, reduce industrial waste, and preserve natural resources. In order to support this Cleaner Production Strategy an Indonesian - German project was launched as part of the Environmental Program that is called ProduksiH (Produksi Bersih).

The Indonesian institution responsible for the project is the Environmental Impact Management Agency (BAPEDAL).

GTZ/PEM is supporting the project with know-how and expertise.

Current priorities include:

Textile

T1 : Gap Analysis Indonesian Government Regulations

T2 : Gap Analysis German Regulation on Textile
Consumer Goods

T3 : Gap Analysis Management System Regarding
Buyer Requirements

T4 : Gap Analysis Öko-Tex Standard 100

T5 : Gap Analysis Typical Buyer Requirement
(Migros Eco - Label)

Leather

L1 : Cost-Benefit-Analysis Leather

L2 : Good Housekeeping Guide for Leather Industry

General

G1 : Good Housekeeping

G2 : Environment-oriented Cost Management

G3 : Chemical Management
