GAP ANALYSIS TYPICAL BUYER REQUIREMENT MIGROS ECO-LABEL

Commonly, buyers' requirements consist of quality, timely delivery, price, and supply assurance. Certain products are also required to meet environmental and social aspects.

One of the biggest retail companies in Switzerland is Migros.

The company has a vast European-wide chain of stores.

BENEFITS

Indonesian textile and garment industry can meet Migros requirements.

GOAL

1. To analyze gap in meeting Migros requirements.
2. To provide recommendations concerning necessary actions to meet the requirements.

3. To provide consultation services in meeting the requirements.

SCOPE OF ACTIVITIES

The gap analysis involves auditing and consultation.

The auditing is to assess conformance of the company's products in meeting Migros requirements.

It contains document reviews, field observation, and interviews. The consultation complements the auditing activity.

The consultation is to provide recommendations concerning necessary actions to meet Migros requirements.

TIME ALLOCATION

The activities will take place in at least 2 (two) days for auditing, and 3 (three) days for consultation.

The amount of time spent for the activities will depend on specific condition in each participating company.

Consultation services for migros eco - label requirements

Training implementation migros eco-label requirements

Recommendation concerning for migros eco - label requirements

WHAT IS PRODUKSIH ?

Indonesia's rapid industrialization is resulting in both increasing discharge of waste and degradation of natural resources.

Meanwhile, industry managers have realized that in order to stay in business they have to integrate environmental considerations into their marketing strategies.

The government of Indonesia has designed its 'Cleaner Production Strategy' to improve competitiveness, foster energy efficiency, reduce industrial waste, and preserve natural resources. In order to support this Cleaner Production Strategy an Indonesian - German project was launched as part of the Environmental Program that is called ProduksiH (Produksi Bersih).

The Indonesian institution responsible for the project is the Environmental Impact Management Agency (BAPEDAL).

GTZ/PEM is supporting the project with know-how and expertise.

Current priorities include:

Textile

T1 : Gap Analysis Indonesian Government Regulations

T2 : Gap Analysis German Regulation on Textile Consumer Goods

T3 : Gap Analysis Management System Regarding Buyer Requirements

T4 : Gap Analysis Öko-Tex Standard 100

T5 : Gap Analysis Typical Buyer Requirement (Migros Eco - Label)

Leather

L1 : Cost-Benefit-Analysis Leather

L2 : Good Housekeeping Guide for Leather Industry

General

G1 : Good Housekeeping

G2 : Environment-oriented Cost Management

G3 : Chemical Management
