# Gap Analysis German Regulations

On Textile  
Consumer Goods

## GAP ANALYSIS GERMAN REGULATION ON TEXTILE CONSUMER GOODS

Considering worsening state of the global environment, government in many countries have enacted various strict regulations in the environment field, with a common aim to recover state of the global environment.

The German government is one of them that have already introduced strict environmental regulations. German is the fourth biggest market for Indonesian textile & garment products, after the U.S., Japan and the U.K. Prior to market their products in Germany, the producers are forced to know and understand what the German regulation for textile and garment products are, and how the Indonesian producers can meet them.

## BENEFITS

Enhancement of capability of Indonesian textile and garment industry in meeting applicable requirements from German Government.

## GOAL

1. To analyze gap in meeting German Government regulation on textile consumer goods.
2. To measure existing company's capability to meet the requirements.
3. To provide recommendations concerning necessary actions to meet the requirements.

4. To provide consultation services in meeting the requirements.

## SCOPE OF ACTIVITIES

The gap analysis involves auditing and consultation.

The auditing contains document reviews and interviews with the company (producer) concerning the operation its.

The results of the audit will be reported.

The consultation complements the auditing activity and encompasses recommendations concerning necessary actions to meet the requirements.

## TIME ALLOCATION

Commonly, 2 (two) local consultants are to conduct 3-day activities, i.e.: a half-day audit, a half-day evaluation, and 2-day consultation.

The amount of time spent for the activities will depend on specific condition in each participating company.

Analyze gap in meeting German government requirements

To measure existing company's capabilities

Provide consultation services in meeting the requirements

## WHAT IS PRODUKSIH ?

Indonesia's rapid industrialization is resulting in both increasing discharge of waste and degradation of natural resources.

Meanwhile, industry managers have realized that in order to stay in business they have to integrate environmental considerations into their marketing strategies.

The government of Indonesia has designed its 'Cleaner Production Strategy' to improve competitiveness, foster energy efficiency, reduce industrial waste, and preserve natural resources. In order to support this Cleaner Production Strategy an Indonesian - German project was launched as part of the Environmental Program that is called ProduksiH (Produksi Bersih).

The Indonesian institution responsible for the project is the Environmental Impact Management Agency (BAPEDAL).

GTZ/PEM is supporting the project with know-how and expertise.

Current priorities include:

### Textile

T1 : Gap Analysis Indonesian Government Regulations

T2 : Gap Analysis German Regulation on Textile Consumer Goods

T3 : Gap Analysis Management System Regarding Buyer Requirements

T4 : Gap Analysis Öko-Tex Standard 100

T5 : Gap Analysis Typical Buyer Requirement (Migros Eco - Label)

### Leather

L1 : Cost-Benefit-Analysis Leather

L2 : Good Housekeeping Guide for Leather Industry

### General

G1 : Good Housekeeping

G2 : Environment-oriented Cost Management

G3 : Chemical Management
